RussBassett CORPORATION

ProMedia - professional audio, video storage

For more than 40 years, Russ Bassett has built innovative quality products backed by real world customer service and a no-nonsense 10-year warranty. ProMedia offers a collection of media storage products designed specifically for today's media formats.

- CDs/DVDs
- Compact tapes
- 8mm or 4mm tapes
- Audio tapes
- DLT/LTO
- Video cassettes

Classic A/V Cabinets

The advantages

- Matches existing installations
- 11 cabinet sizes to choose from
- 5 drawer heights available
- Classic chrome flush drawer pulls
- Small stackable cabinets round out the offering
- All cabinets available with locks

Vertical Lateral Extra-Deep

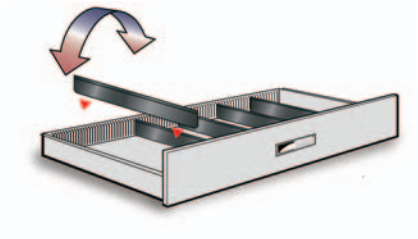
Classic cabinets

The classic design matches our Microfilm files and are often used together in libraries.

Cabinets are perfect for distributed collections.

Drawer dividers

Drawers are designed to accept movable flat steel dividers, adjustable in 1/4" increments.



Stackable cabinets

Stackable cabinets are great for small or growing collections.

Cabinets are especially suited for smaller media and CDs, providing the highest capacity per square foot.

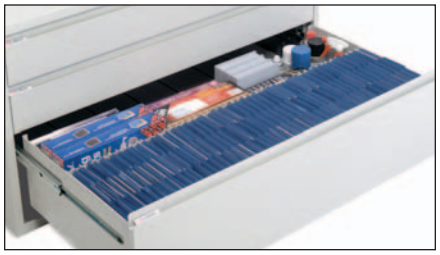
RussBassett CORPORATION

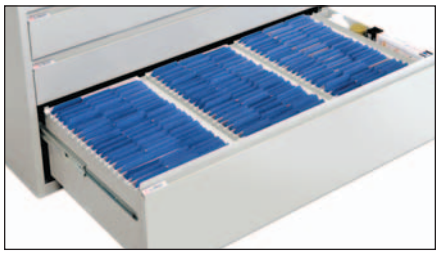
ProMedia Cabinets

The advantages

- Lower initial equipment cost
- Pre-configured or build-your-own custom cabinets
- Improved flexibility
- Floor space efficiency
- Easily reconfigure drawers as your media migrates to new formats
- Mix and match drawer sizes
- Ease of installation and relocation
- Optional security locks

Compare the ProMedia Extra-deep lateral cabinet (left) to typical lateral cabinet (center)





More capacity

24" deep jumbo cabinets provide over 50 percent more capacity compared to typical cabinets.

Overfile

Overfile cabinets are available in 48" width. They feature the same, patent pending shelf design as the Slidetrac and Gemtrac systems. Great for additional CD storage.

More case sizes

Three heights – 27, 43 & 59" – enable you to order the exact size you need for growing or mature media collections.

Two widths – 30" wide and jumbo 48" wide – hold more media and adapt to more floor plans.

More flexibility

Infinitely adjustable drawer dividers accommodate media-specific and mixed-media collections. Optional bookends are recommended for rows that are not completely filled with media.

More drawer heights

Full extension drawers are available in seven heights – 4, 5, 6, 7 & 8" – to accommodate all popular media formats, plus 11 and 12" for letter and legal paper sizes. The drawer back may be positioned for letter, legal or full-depth storage.

ProMedia
Gemtrac

The advantages

- Highest capacity available
- Enclosed design is lockable
- Accommodates all media sizes
- Quick installation – easy to relocate
- No floor tracks – installs over carpet
- Less walking – an entire library at your fingertips

Clear aisles
There are no floor mounted tracks to install or trip over.

Various sizes
Two heights – 81 & 90" – and three standard widths – 30.25, 32.25, & 34.25" – provide a wide range of capacities to choose from.

Mixed media
Adjustable interior drawer shelves may be configured to store mixed media within a drawer or mixed media on a shared shelf.

Media-specific
Entire cabinets, drawers or shelves may be dedicated to a specific media type.

Easy access
All media within a Gemtrac is readily accessible and within reach.

Accessories
Gemtrac accessories are interchangeable with shelving and include wire bookends, adjustable backstops and discrete-slot wire racks.

Installation
Installation or relocation time and expense are minimal with factory-built, pre-assembled components.

Multiple drawer sizes
Four drawer depths – 5, 6, 7 & 8" – to accommodate all popular media formats. Gemtrac may be specified with all common drawer sizes or any combination of up to four different drawer sizes, which fit standard overall widths.

Overhead tracks
Drawers open smoothly on our patented overhead track system.

Store 3,300 Small Beta Tapes in 25 Square Feet!

What is Gemtrac?

Gemtrac high-density, lockable storage system saves 50 percent floor space over conventional shelving. Units incorporate two large cabinets with multiple vertical pull-out drawers that are contected by overhead tracks.

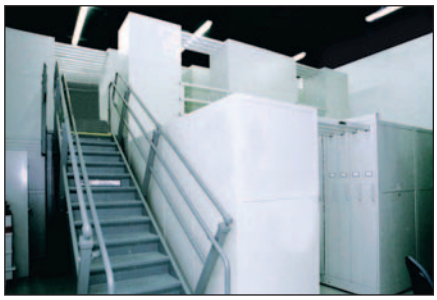
Vertical storage drawers share a common support track and access space for maximum space utilization. Drawers glide effortlessly on overhead rollers, providing a easy-access ergonomic storage solution.

Adjustable shelves

Shelves are adjustable on 1/2" centers for additional media density. Interior drawer accessories can be configured without tools or additional hardware.

Staggered handles

Space efficient handles are staggered to maximize storage and protect hands when opposing drawers are open.



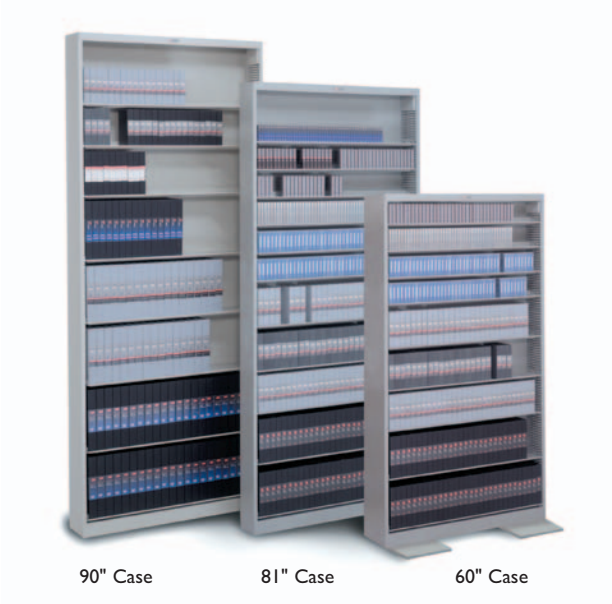
Double-stacked Gemtrac units

Gemtrac units can be double-stacked where ceiling height permits, providing maximum storage in a small foot print.

ProMedia
Shelving & Slidetrac

The advantages

- Lower initial equipment cost
- Greater flexibility
- Floor space efficiency
- Quicker visual & physical access
- No drawers or doors to open
- May be installed over carpet
- Ease of adding more units as your collection grows
- Cabinet & shelves are factory assembled, not "KD"



Applications

ProMedia shelving may be wall-mounted or installed back-to-back and side-to-side, or may become an integral part of a Slidetrac system.

More Capacity

ProMedia shelving is adjustable on 1/2" centers (vs. 1" or more). For smaller media, this often allows 1 or 2 additional shelves per cabinet. Cases are available in 60, 81 and 90" heights.

More Convenience

The shelves are a revolutionary new design that enable the use of new labor-efficient accessories. Built-in tracks position the accessories and provide a finger gap for easy media access. These new shelves are stronger and thinner — often allowing additional shelves to be fitted into a case. Two depths – 5.5 & 7" – store every popular media format. Shelves are easily installed or relocated without tools or loose hardware.

Accessories

Adjustable backstops position all media toward the front edge of the shelf. This reduces labor costs by improving visual and physical access. It also reduces the space otherwise required between adjacent shelves. Adjustable Slide-N-Lock bookends support media at any desired increment along the shelf.

Finger space

Shelves are designed to maximize storage yet provide adequate finger space for retrieving media.

More Media

Group mixed media projects together with the infinitely adjustable Slide-N-Lock bookends.

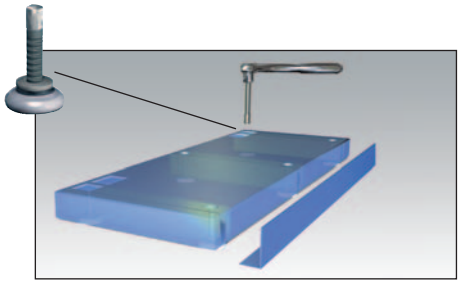
RussBassett CORPORATION

What is Slidetrac?

Slidetrac is a base track system that exclusively uses ProMedia shelving. Convert stationary shelving to compact shelving, either two or three rows deep.

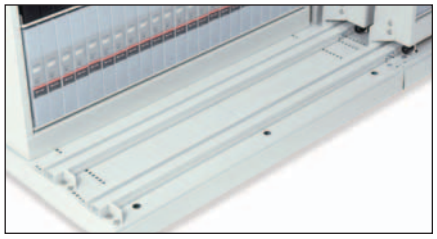
Overhead tracks

Overhead tracks ensure stability and precise tracking.



Easy installation

Avoid endless hours of leveling and re-leveling. Slidetrac bases have six individual leveling glides that are accessible from the top, even after installation. Shelving sections are fully-assembled, welded cases shipped in place, and ready to use.



Ease of movement

Oversize nylon wheels roll smoothly and quietly for effortless side-to-side gliding of the front units. Systems are two or three sections deep with a stationary rear row.

Since 1960, Russ Bassett has built a reputation for high quality, innovative products.

At our headquarters in Whittier, California, we pride ourselves on designing and manufacturing uncompromising technical furniture and storage products.

Our experience includes more than 2000 product installations spanning a range of applications including Fortune 500 companies, banking, insurance, utilities, libraries, medical, broadcast, government, military and more.

Experienced Russ Bassett representatives are experts in determining and creating "best fit" product solutions based on your personnel and equipment requirements.
