UWR<sup>™</sup> and UWRmini<sup>™</sup> Storage Systems

#### **DESIGN AND CAPABILITIES**

Cabinets and interior accessories are totally reconfigurable, permitting innumerable weapon storage configurations. For long weapon storage, use a minimum of the following components: one (1) cabinet, one (1) universal base, one (1) support rail and the quantity and type of barrel supports and pairs of stock cups equal to the quantity of guns to be stored. For pistol storage, all of the previously listed components are needed except stock cups.

### **CABINETS**

- A. The fully welded, heavy-gauge steel cabinets are available in five heights (outer dimension): 17.88" (454mm), 34.38" (873mm), 44.88" (1140mm), 61.38" (1559mm) and 83.88" (2130mm).
- B. Doorframe heights (clear openings) are 13" (330mm), 29.5" (749mm), 40" (1016mm), 56.5" (1435mm) and 79.0" (2006mm) high.
- C. Usable storage heights (inside the cabinet) are 15" (381mm), 31.5" (800mm), 42" (1067mm), 58.5" (1486mm) and 81" (2057mm) high.
- D. All standard UWR Storage Systems in all heights are 42.38" (1076mm) wide and 16.25" (412mm) deep. All UWRmini Storage Systems, are 22.38" (568mm) wide and 16.25" (412mm) deep.
- E. The standard cabinet doorframe width (clear opening) is 36.5" (927mm) wide. The mini cabinet doorframe width (clear opening) is 19.0" (483mm) wide.
- F. The standard cabinet usable storage width (inside the cabinet) is 36.5" (927mm) wide. The mini cabinet usable storage width (inside the cabinet) is 19.0" (483mm) wide.
- G. Built-in, folding, retractable cabinet doors retract completely inside the cabinet when fully open, so there are no swinging doors, obstructing the aisle way or blocking neighboring racks.
- H. The doors, sides and back of cabinet are perforated with a diamond mesh pattern, allowing visible counts or weapon inventory to be taken even when the cabinet is

closed and locked.

#### BASES

- A. The full-width bases mount inside the floor of the cabinet and serve as a rest for weapon stocks.
- B. The universal base, available for the standard and mini cabinet, with its individual stock support slots can accommodate many weapons by merely changing the location of the stock cups.
- C. In addition to the universal base, a number of other specialty bases (for standard cabinets) only are available for storage of 2, 4, 5, 6, 7, 8 and 10 long guns.
  - 1. Specialty bases are black vinyl-coated to protect the gun stock, mount inside the bottom of the cabinet and serve as gun stock rests.
  - 2. The 2-weapon base contains slots to accommodate four (4) extra barrels in addition to its two (2) gun stock positions (designed specifically for M2's).

### SUPPORT RAIL

- A. The versatile powder-coated support rail mounts in the cabinet on 1.5" (38mm) vertical increments using interlocking keyhole slots.
- B. The overall height of the support rail is 5.31" (135mm).
- C. A minimum of a one support rail is required whenever any barrel supports are used. The support rail is perforated to receive the barrel supports.
- D. A heavy duty support rail is available and is to be used with large and/or heavy weapons, hand guns and transport components.

#### **BARREL SUPPORTS**

- A. A wide variety of barrel supports are available to accommodate virtually any weapon type.
- B. The barrel supports are powder-coated and black vinyl-dipped to protect the gun barrels. Barrel supports clip into the support rail via lances. Multiple types of barrel supports may be used on the same support rail. An optional fastener is included to secure the barrel support to the support rail.
- C. Some weapons require the use of receiver mounts in addition to the barrel supports. Receiver mounts contain a pin on a lanyard. The pin engages through the weapon.

### TRANSPORTABILITY COMPONENTS

### A. Universal Base & Stock Cups

- The universal base (UWRBU) mounts inside the bottom of the cabinet. The standard width universal base contains two (2) rows of 28 keyholes slots that are on the same centers as the mounting holes in the support rail.
- 2. The injection-molded thermoplastic stock cups (UWRBSC) have vibration-proof fasteners that are inserted into the round portion of the keyhole slot of the universal base and are slid into position.
- 3. The standard stock cups (UWRBSC) are sold in pairs and securely hold the weapon stocks in place (universal base and stock cups sold separately).
- 4. The combination (universal base & stock cups) accommodates from one (1) to ten (10) weapons within the rack (depending upon weapon size and type). NOTE: A few large/heavy weapons use a different stock cup design.
- 5. When used for transport, the universal base must be attached to the rack with fasteners (included).

### B. Weapon Supports

- 1. Secure Barrel Supports
  - a. Available in a number of sizes and configurations, these brackets mount to the support rail using self-tapping screws.
  - b. All barrel suports are powder-coated and black vinyl dipped to protect the gun barrels.
  - c. The slots at the back of the support allow 1.5" vertical adjustability.
  - d.The bracket cradles the weapon in a v-shaped notch. A custom rubber strap rotates down and holds the weapon in place. The bracket also serves as a cap to prevent the weapon from moving up and dislodging from the stock cups.
- 2. Large Weapon Supports
  - a. Weapon-specific components are available for securing the following large weapons for transport. Examples include the M2, MK19, M240B, M240D and M240H.
- 3. NOTE: The heavy duty support rail is required for use in all transportability applications.

#### C. Handles

- 1. Available either factory-mounted or field-installed, handles are riveted to the cabinet.
- 2. Used to lift the rack for transport, handles are manufactured with a stop at 90 degrees.
- 3. If factory-mounted, six (6) handles are placed on each standard and mini cabinet, with the exception of the 18" cabinet, which has four (4) handles.
- 4. Handle kits for field-installation are available with four (4) or six (6) handles per kit (UWR4HK or UWR6HK, respectively).

#### D. Cart

- 1. Specifically designed for the UWR, this cart bolts to the rack for movement within a facility.
- 2. The cart features industrial grade casters for ease of movement, and adds 6.917" (176mm) to the height of the cabinet.
- 3. Available for both the standard and the mini cabinet.

### STOCK CUP PLACEMENT GUIDE USING STANDARD WEAPONS

10 Weapons: Every 3rd slot starting with the first slot
9 Weapons: Every 3rd slot starting with the second slot
8 Weapons: Every 4th slot starting with the first slot
7 Weapons: Every 4th slot starting with the second slot
6 M249's: Every 5th slot starting with the first slot
6 M60's: Every 5th slot starting with the second slot
Slots referenced from left to right

NOTE: These are guidelines for standard weapons without gear/optics attached. Weapons with optics attached, side charging handles, non-standard stocks, spade grips, etc., may require an adjustment in spacing.

#### AVAILABLE POWDER COAT PAINT COLORS

- A. Spacesaver stocks components for the Universal Weapons Rack in powder coat Forest Green (FG).
- B. In addition to Forest Green, the Universal Weapons Rack is now offered in five other standard colors: Frost (FR), Blue Grey (BG), Black (BL), Nevada Beige (NB) and Locker Grey (GL).
- C. Many other powder coat paint colors are available; however, there is an upcharge and a slightly longer lead time.

#### **BIN SYSTEM FOR CABINETS**

- A. The vertical and horizontal bin systems are designed to store gear, optics, ammo clips, ammo boxes and other special equipment inside the cabinet. Bin systems are available for all rack heights.
- B. A single standard cabinet may contain one (1), two (2) or three (3) vertical bin systems. A single mini cabinet may contain one (1) or two (2) vertical bin systems.
- C. The 45" and 61" standard and mini cabinets may also have a horizontal bin system. Horizontal bin systems require the use of a UWRSR42 support rail. Sold separately.
- D. Vertical bin systems for 18", 34" and 45" cabinets are the height of the cabinet. To incorporate a vertical bin system into a 61" cabinet, order the vertical bin system desired (1/3, 2/3 or full width), a support rail for the horizontal bin system, and at least the base shelf of the horizontal bin system. The base shelf of the horizontal bin system is needed to support the vertical bin system below (on the other cabinets, the top of the cabinet supports the bin system so no additional shelf is needed).
- E. Complete kits for both the vertical and horizontal bin systems include all the components needed to install any of the bin system configurations desired. Customers can configure and reconfigure their racks for 1/3, 2/3 or full width bin systems at any time. See following pages for clarification.
- F. If ammo boxes are stored, use the ammo base with the bin system(UWRBINVABS).
- G. A special bin system (UWRBINFL10) exists for the 18" standard width cabinet. It fills the cabinet and provides for two (2) rows of five (5) equal openings (10 equal openings total).

#### **APPLICATIONS**

- A. Racks can stand-alone on the floor, be stacked two-high and be ganged together. They can also be mounted on mobile carriages. A cart is available for mounting to individual cabinets.
- B. To gang racks, we suggest using .25 20 unc x
  .5" .75" long hex bolt or screw with matching
  .25 20 unc nut., which are supplied by Spacesaver in each rack.
- C. Racks may be stacked to a height **not to exceed** 95.75" (2345.88 mm).
- D. Leveling feet are included with all cabinets (to be used if needed).

A complete Vertical Bin System contains the following

components to make any of the configurations listed

3 – 1/3 Vertical Bin Systems

1 – 2/3 Vertical Bin System

1 - Full Vertical Bin System

BIN SYSTEMS The Bin Systems for the UWR are essentially shelving systems for use inside the UWR and UWRmini.

VERTICAL BIN SYSTEMS The "Vertical" Bin Systems are named for the vertically mounted walls used to support each shelf.

## STANDARD WIDTH CABINET MINI CABINET VERTICAL BIN SYSTEM COMPONENT OPTIONS **VERTICAL BIN SYSTEM COMPONENT OPTIONS** A 1/3 Vertical Bin System contains shelves that are 1/3 A 1/2 Vertical Bin System contains shelves that are 1/2 the width of the cabinet. (A) the width of the cabinet. (A) A 2/3 Vertical Bin System contains shelves that are 2/3 A Full Vertical Bin System contains shelves that are the full width of the cabinet. # STANDARD AND MINI CABINET:

61" CABINET – Ten (10) openings (8-5" tall; 2-4" tall)

45" CABINET – Seven (7) 5" tall openings

34" CABINET – Five (5) 5" or seven (7) 4" tall openings

18" CABINET – Two (2) 5" tall openings

above:

**HORIZONTAL BIN SYSTEMS** Designed like the vertical bin systems, considered horizontal because they are longer than tall. A separate support rail is required for horizontal bin systems. Designed for the top of the 45" and 61" cabinet. To have the a full bin system in 61" cabinet, the horizontal bin system is required.

A horizontal bin system must be at least as wide as the vertical bin system underneath.

### HANDGUN STORAGE

The UWR cabinets can be used fully for handgun storage (between 30 and 120 handguns depending upon cabinet size). For smaller quantities, consider utilizing the space above long guns by adding additional support rails. Each support rail will store a maximum of 15 pistols so they are easily accessible.

**UWR KITTED CABINETS – NON-TRANSPORT** In order to simplify the planning and ordering process, Spacesaver has released catalog numbers for UWR cabinet "kits." Each kit (one catalog number) contains the cabinet and all the parts and accessories required to store the same weapon in one cabinet. These kits are available to accommodate the most popular weapons, including M4, M16, M249, M240B, M2, MK19 and M240D, in both Non-Transport or Transport configurations, as well as in the standard UWR cabinet width and the UWRmini.

These kits are outlined below and on the following pages.

## Pistol Rack

## Weapons Rack III

#### WEAPONS RACK III

- Requires Spacesaver 4-Post Shelving sections for mounting. 4-Post Shelving sold separately.
- Minimum 10" deep shelves/uprights needed. 10" deep shelving will support weapons with scopes or pistol grips.
- 3. Available in the following widths: 30", 36", 42" & 48".
- SWR3XX: Each Weapons Rack III Kit includes one
   (1) base plate [powder-coated in any standard color with black rubber stock pads] and one (1) black vinyl-coated barrel rest.
- 5. Barrel rest adjusts up and down in 4-Post Shelving keyhole slots to accommodate a variety of weapon lengths.
- 6. Can be configured for two levels of long gun storage.
- In Mechanical Assist mobile applications, bungee cords and eyehook kits (SWR2K36 or SWR2K48) should be used.

#### PISTOL RACKS

 Pistol Racks are a 2-piece design that mount directly to Spacesaver 4-Post or Case-Type shelves. The

- barrel and butt rests are vinyl-coated to protect handguns.
- 2. The complete 2-piece unit is 6" deep. The recommended minimum shelf depth, depending on the type of handgun being stored is 10". 15" deep shelves are recommended to accommodate extra long barrel lengths. When storing basically one-type of weapon, such as 9mm, place racks on 10" deep shelves and incorporate into a storage system along with the long gun weapon racks.
- 3. Recommended shelf spacing is 9" on center.
- 4. Pistol Racks should be attached to the front of the shelves so that barrels point in and can hang off the back of the shelf. NEVER position weapons so that the barrels face a person.
